ABSTRACT

This internship report is based on the internship program that I had successfully completed in K-AKA Technology Services, under the development department, as a requirement of my BE program in the Department of Computer Science and Engineering, VTU University. As being completely new to practical, corporate world setting, every hour spent there gave me immense amount of experience all the time. But nevertheless, they were all useful for my career.

This report is divided into four chapters. The first chapter of this study deals with the detailed description about the company and its different domains. The second chapter deals with the detailed description about the department in the organization as well different services provided by this department. The third chapter is about the different tasks performed by me in the organization. The fourth chapter is about the reflection notes that describes my experience in the organization. The last is about the references that are referred while the tasks are performed.

The internship program has broadened my knowledge base, which was made possible through my participation in the various tasks that were assigned to me and my interaction with my colleagues at the organization. It has been a wonderful experience at K-AKA Technology Services, and it will be of much benefit to the organization if it continues to create similar platforms for young people as a way of building their experience in the organization.
